

Heavens on Earth

For the origins of Heavens on Earth (HOE), see [Everything in Nothing](#) (EIN). Basically, the twelve derive from the seven by having the bottom four (4-7) set up as a cross interact with the top three (1-3), yielding three crosses that correspond to the Cardinal, Fixed and Mutable signs. There is the immediate resonance with the seven of UID ([Unity in Diversity](#)) from the prior level of EIN (UID is Level 6 and HOE Level 7) and there are the resonances with the overall seven levels of EIN as well as with the seven rays. Again, see EIN (under the subheading **12**) for all these derivations and resonances as well as others within EIN and UID. The resonances with the crosses by elements, numbers and signs are:

In the grand drama of the Divine Theme, there really are only three genres: the hero's journey, the love story and the tale of redemption. All other genres, subgenres, alternatives and fashions are contained therein, eventually. The play proceeds against the backdrop of the heavens and lines up on the crosses. Resonances with elements, numbers and signs apply.

Cardinal	Fixed	Mutable
Hero's Journey	Love Story	Tale of Redemption

Within the crosses, the process repeats in resonance, with a fourth position of integration added, a position that brings it down to earth, so to speak, in sacrifice and surrenderance to God. This fourth position is really just the overall love story with God, which of course and in fact all the genres are in their deepest direction and most moving motives.

Sacrifice/Surrenderance

Earth
Hero's Journey Fire + Air Tale of Redemption
Water
Love Story

The horizontal axis implies that a hero's journey goes through a tale of redemption and a tale of redemption involves a hero's journey, which is to say the poles must come to terms with each other no matter where you start. The vertical axis has it that a love story includes sacrifice and surrenderance to God and that such sacrifice and surrenderance comes via a love story. Associations with the signs give deep context to divine astrological themes: ♃ is the hero's hero, ♀ the lover's hero and ♂ the hero of redeemers; ♁ is the redeeming hero, ♁ the redeemer of love and ♀ the redeemer of redeemers; ♀ is the hero's love (and the love for heroes), ♀ the lover's lover and ♀ the redeemer of love; and ♀ is heroic sacrifice, ♀ the sacrifice and surrenderance of love, and ♀ the sacrifice (and surrenderance) for redemption.

In the Avataric astrology section of The Heavens on Earth book, divine free impressions as well as divine difficulties (traditional vices, bindings and barriers) are paired with the signs and related to the crosses. We can expand on the difficulties to include a deficiency of energy expression and an excess of energy expression and then consider the task in and of each sign to be working though the deficiency and excess expressions to reach the divine free impression/expression. There is a sense of progression here but actual experience and expression is anything but linear. We can say, however, that it starts with little or no energy available (deficiency) and ends is full divinity (without any excess or deficiency left). The keywords are listed with deficiency first (on top) then excess and finally divine (on bottom in bold). Number (EIN, Ray, UID), element, sign and story resonances are worth contemplating.

In [The Heavens on Earth book](#), three coordinate systems are used: geocentric tropical, geocentric sidereal and heliocentric sidereal. While all are from a veiled perspective, these coordinate systems have their major resonances as follows: geocentric tropical with the Astral/Gross and hence Incarnating Soul, geocentric sidereal with the Atmic/Subtle and hence Yogic Self, and heliocentric sidereal with the Archangelic/Causal and hence Bodhisattvic Being. And the cardinal hero, fixed lover and mutable redeemer have resonance by aspects with the Subtle (A I), Causal (A II) and Gross (A III). Note the Gross to Causal progression as III, I and then the II in the middle.

Coordinate System	Spheres	Embodied Soul	Crosses/Genres
Heliocentric Sidereal	Archangelic/Causal	Bodhisattvic Being	Fixed Lover
Geocentric Sidereal	Atmic/Subtle	Yogic Self	Cardinal Hero
Geocentric Tropical	Astral/Gross	Incarnating Soul	Mutable Redeemer

It should be noted that Meher Baba’s Geocentric Tropical chart has the Sun and Earth square to Pluto and its polarity point in the signs of the Mutable Cross and His Geocentric Sidereal chart has this same formation in the signs of the Fixed Cross, the Cardinal Cross in that Geocentric Sidereal chart being notably occupied in three of four positions by the AC/DC line and the moon forming a T-square. And most notably, Meher Baba’s Heliocentric Sidereal chart is *defined* by the Fixed Cross. See [The Heavens on Earth book](#).

The organization of Heavens on Earth, a particular view on the organization of astrology, takes the structure of twelve three different ways on three different levels. The planets/points, signs and houses are the three different ways and the three coordinate systems above relate to the three levels. The planets and points (AC, MC) refer to different aspects of the psyche arranged in groups of three (chords) and correspond to the “who.” The signs give the “how” and along with the houses the “what”, while the houses give the “where” and transits help with the “when.” The “why” is implicit in the HOE take on astrology: to work your charts so as to complete your karma, do your dharma and realize your destiny (for this lifetime) in the context of the Divine Theme.

Destiny	Dharma	Karma
To Consciously merge with God	To fully experience God as Love	To redeem and requalify the sanskaric substance of Creation
The Grace that sets you free	The Path that beckons the Embodied Soul	The ties that bind the (M/S/G) bodies

The planets/points (aspects of the psyche) number twelve and can be related to the Egoic Matrix and vehicles associated with one Embodied Soul level (3 + 3 = 6) combined with those associated with an adjacent Embodied Soul level (6 + 6 = 12), specifically the Incarnating Soul with the Yogic Self (geocentric tropical) and the Yogic Self with the Bodhisattvic Being (geocentric sidereal).^{*} For the heliocentric sidereal system and the Bodhisattvic Being relating to all the vehicles and absorbing all the Egoic Matrices, the twelve is maintained as three times three vehicles plus one tripartite Egoic Matrix. But for veiled perspectives in relation to the planes and the three worlds, there are as few as eleven or as many as sixteen planets/points, depending on how you look at it. The correspondences are listed in:

[Astrology, Functional Typology and the Embodied Soul](#)

^{*} There is also a relationship of these Soul parts with the eight developmental levels of UID. From the bottom up, UID levels 1-3 are resonant with the Lower Triad vehicles, levels 4 and 5 with the Incarnating Soul and Yogic Self Egoic Matrices, and levels 6-8 with the Upper Triad vehicles. See *The 8-Structure* in [Integrated Healing for the Incarnating Soul](#).

Beyond Rulership

The following chart is adapted from [Everything in Nothing](#) and lists the twelve spiritual principles as they resonate with the signs in the three chart orientations used in The Heavens on Earth book. It also lists the Foundational Resonances for the signs as introduced in Everything in Nothing.

House	Sign	Foundational Resonance	Esoteric Rulership	Secondary Rulership	Primary Rulership
		All Charts	Helio Sidereal	Geo Sidereal	Geo Tropical
		All Spheres	Causal	Subtle	Gross
1	♈	A I ♁	R7	A I	R6
2	♉	R1 ☉/V	☉	☉	R5
3	♊	R2 ♃	R5	☼	R7
4	♋	R3 ♈	A II	R4	R4
5	♌	A II ♉	R1	R1	R1
6	♍	R4 ☊/♃	☼	R7	☼
7	♎	A III ♋	A III	R5	☉
8	♏	R5 ♍	R6	R6	A I
9	♐	R6 ♎	R4	A II	R2
10	♑	R7 ♏	R3	A III	R3
11	♒	☉ ♏	R2	R3	A III
12	♓	☼ ♏	A I	R2	A II

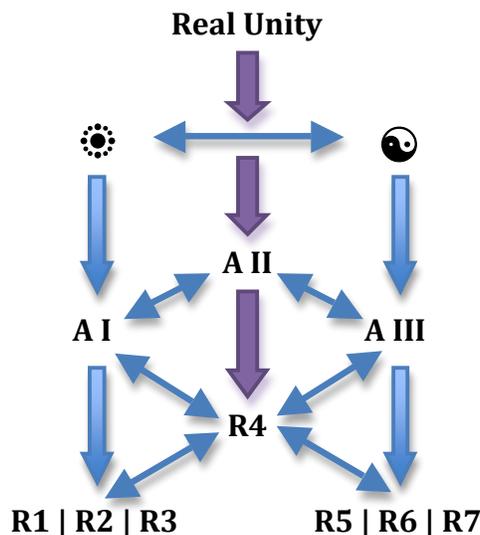

Primary, secondary and esoteric rulership apply to all charts but here are given specific resonance with particular charts and hence particular spheres. While Foundational Resonance applies to all charts and all spheres, it is particularly suited to the Composite Sphere and relationship with the Embodied Soul at some level. This relationship, this sphere and these resonances speak to living in one of the three worlds but not being of them. There are only three worlds (Mental/Causal, Subtle and Gross) and all embodied beings live in one of them (with varying connections to the others). There is no separate world for the Composite Sphere. For example, the lower Composite Sphere that we have called the astral is not really a separate world, i.e., it doesn't exist as a separate world, i.e., it doesn't really exist at all, even more so than none of the illusory Creation really exists. The so-called astral world is a combination of the Gross world contents (intellectual, emotional and physical) experienced through nascent Subtle senses and emergent Subtle world contents experienced through extensions of the Gross senses and registered through those Gross senses.

The twelve spiritual principles can be associated with the aspects and attributes of the Embodied Soul. See [Everything in Nothing](#) under **3** for the presentation of these aspects and attributes.

ATTRIBUTES		
Sat	Ananda	Chit
☼	A II	☯

ASPECTS	Mahesh	Vishnu	Brahma
Mahesh	R 1	R 2	R 3
Vishnu	A I	R 4	A III
Brahma	R 5	R 6	R 7

The implied derivation, consistent with EIN, is that the Real Unity gives birth to Duality, with the “remembrance” of this showing itself in a (false) Unity that is opposed to an illusory Duality, marking the primary and somewhat hidden duality of Duality. From here, the Real Unity can be appreciated as a mediator from and in what will be A II. Through A II, the false Unity reflects as A I and the illusory Duality reflects as A III. The A II (and the Real Unity behind it) then reflects as R4. Through R4, A I then differentiates as R1-3 and A III as R5-7.

The attributes and aspects lie behind the spiritual principles as shown in the above tables. It can even be said that these associations are how the three (3 attributes and 3 x 3 aspects) relate to and take up the twelve (7 + 3 + 2 spiritual principles). In the Beyond Rulership table, the planets are listed in the foundational resonances column in their relationship with the spiritual principles, which remains constant throughout HOE. The attributes and aspects, however, are not functions of the psyche and relate in HOE through the signs associated with the spiritual principles, those principles coming through planets as they are rulers for the various charts or directly through the foundational sign/principle/planet resonance, which applies to all charts. This resonance is not a sort of super-rulership for the signs because the signs become more ruled by the associated spiritual principle with the corresponding planets then carrying this spiritual principle. This implies that the spiritual principles (as 12) have one level of association through the planets in the charts and a deeper level of association through the signs, a level of association that then brings them to the aspects and attributes. So when we are interested in spiritual principles from the level of spiritual principles, we would look at the corresponding planets, and when we are concerned with the aspects and attributes, we would look at the spiritual principles and their associated signs (in all charts).

For the purposes of understanding reuptake, we can look at the attributes and aspects through foundational sign resonances and sign association with the planets (carrying spiritual principles) in the three chart orientations.

Turning to Meher Baba's charts and taking them as instructive for the human race at this time, the perspective taken in The Heavens on Earth book, we have specific planets in the signs of foundational Sat | Ananda | Chit reuptake.

Geo Sidereal Chart	♁ ♌	♁ / ♃ ♁	☉ / ♃ ♀ , ♁
	The dharma of the Loving mind (the new way with the mind) allows communication with the Mental planes	Suffering for self and esp. others when Cheerfully accepted reveals the Mysteries of the Earth path and sets right all former wrongs	Willingly Serving with your ego and a desexualized love (Right Human Relations) helps break the spiritual ties that bind and brings Freedom from Mayavic mischief

Relevant Meher Baba quotes for the above planets (How to Love God) as related in the Heavens on Earth book are:

☉: If we endure our lot with patience and contentment, accepting it as His Will, we are loving God.

♃: If we suffer in the suffering of others and feel happy in the happiness of others, we are loving God.

AC: To love God as He ought to be loved, **we must live for God** and die for God, knowing that the goal of all life is to love God, and find Him as our own Self.

♀: To love God in the most practical way is to love our fellow beings. If we feel for others in the same way as we feel for our own dear ones, we love God.

♁: If, instead of seeing faults in others we look within ourselves we are loving God.

Note that ♂ representing ☉ in ♋ is in the sign of its foundational resonance. From Everything in Nothing:

♋ ☉: Duality of Spiritual and Material, Self and Other; the Individuated Self serving Others, acceptance of diversity (duality).

Pushing this further, we can add the 3 x 3 Brahma | Vishnu | Mahesh aspects as they resonate with the Egoic Matrices and the Spiritual Principles for all resonances and all astrological charts, in general and for Baba's charts. Mahesh/Mahayogi Esoteric Rulership Helio Sidereal	R1 ☉ ♌ Cut Off	R2 ♃ ♋ Support	R3 ♎ ♎ Supply
General	When it comes time to actualize a new plan, supplies and support will be Cut Off from the source along with the old sense of self, which shows that God is indeed in charge and His Will, Wish and Whim rule the roost	Love and spiritual, non-judgmental understanding go together with joyful cooperation and faithful service to Support God's Plan and rid the worlds of unnecessary suffering	Holding the structure together, maintaining order and keeping the karmic accounts up to date ensures the Supply cycles continue
Baba's Chart	⊕ ♃ ♀ ♁	☉ ♁	—
	With the ⊕ in functional detriment and the karmic ♃ accompanying it as always, our dharmic duty is curtailed and our karmic cup emptied as our consciousness is Cut Off from the concerns of any world; and our sole relationship becomes our relationship with God in preparation for Realization, the mystery of all mysteries and the final mission	With the ☉ in detriment, the ego of the Embodied Soul (even the Bodhisattvic Being) can let go and the Embodied Soul then survives on the Support of God and His Maya	God Supplies what the lover needs, no questions; so the lover may surrender

Vishnu/Saint Esoteric Rulership Helio Sidereal	A I P ☿ Withdraw	R4 ⊕ ♂ Sustain	A III ♃ ♄ Nurture
General	God's Will is the destruction of the false and the Withdrawal of consciousness from the illusory Creation at the predestined time, which involves the fulfillment of any lingering spiritual desires in your divinized human nature, the forgiveness of any niggling infractions to or by your false self, and the sacrifice of any remaining attachment to that false self and unrealized nature	The goal of life is set and the path to that goal Sustained by staying focused on God and not losing your direction as conflicts are facilitated and even instigated with fellow souls, every kingdom of nature, and your very body and mind in order to resolve issues and heal wounds and harmonize the whole so you can return all that has been borrowed from the Material Mother herself and go to God	Individuality and creativity are Nurtured by keeping them in equilibrium with Divine Law; all relationships are Nurtured by bringing together and bringing into balance; and the challenges of the play of Creation are seen to by Nurturing the Original Creation as it is within each and all and contains all the paths, plans and answers

Brahma/Sage Esoteric Rulership Helio Sidereal	R5 ♀ II Abandon	R6 ♂ III Maintain	R7 ♀ IV Preserve
General	One must have the knowledge that knows when, where and how much to Abandon; and one must have the connections that enable one to have that knowledge; all of which requires True Love (Love for Truth, Love-Truth) working through the Mahesh will and the II mind	To Maintain the overall scheme in deference to the Divine Theme, we must allow change in the underlying details, which requires devotion and doing ones duty with respect to both the big picture and the little things	One has to actively assert to Preserve, and the Preservation is rooted in the patterns in the mind—in keeping concentration on those patterns and connection with them, in keeping them consecrated and the level-appropriate energy flowing
Baba’s Chart	—	♂	—

Secondary Rulership	☉ ♀ ♏ Knowledge	A II ♀ ♁ Truth	☉ ♂ ♏ Peace
General	Know thyself in individual sanskaric makeup and through renunciation of the false, find your way through the mystery of Atmic existence—that your long coveted Yogic Self with all its power and pleasure is nothing and knows nothing yet can be given to God and please Him	Power feels good but is a false and ephemeral bliss that leaves one in desperate straights; Real Power comes from the higher fusion of Love and Truth/Wisdom and radiates bliss with its Illumination; devotion to God grants access to this through the Yogic Self	The striving for spiritual independence, like the material striving before it, has left nothing to have and hold; Peace of mind and safe Yogic Self-emPowerment need intelligent action and proper valuing of mayavic duality as nothing in itself, as does the path through conflicts, provocations and myriad all-around troubles
Baba's Chart	—	♁	♁ ♀ ♀
	Ruling the sixth house: inner perception and spiritual connection/communication allow duality (the mind-body of ♏) to be harnessed for the service work of spiritual healing, which requires real Knowledge and reveals the existence of your Yogic Self, which must be renounced for God	The spiritual instinct to know the Truth takes you through the Path, the Truth revealed through devotion to God	In Peace we meet love and understanding, renewal and reverence, and the simplicity and stability of Divine Love that give us the proper Yogic Power for intelligent action in line with God's Plan

Mahesh Aspects	Mahesh	Vishnu	Brahma
Mahesh/Esotericist Secondary Rulership Geo Sidereal	R1 V ♁ Destroy	R2 ♃ ♃ Protect	R3 ♄ ♄ Create
General	Destruction before construction (Mahesh Destroying before ♁ Creating) can harness the secret power to esoteric success	The path to finding the Yogic Self and then the True Self after that is Protected by non-judgmental understanding and keeping the Head and Heart balanced	Discipline, responsibility and active intelligence is demonstrated when humanitarian and universal goodwill are Created
Baba's Chart	⊕ ♃	♃ ♁	♁/V ♄
Note that all three aspects have a planet in detriment, speaking to the general decreased emphasis (detriment) of the Mahesh/Esotericist aspect within the Mahesh aspects	The ⊕ is functionally in detriment here as it is opposite the ☉, which is associated with the secondary ruler V ; the Destruction that is necessary is of Subtle ego issues with respect to the spiritual path, not the Earth or the Earth path; ♃ is guarding the Earth here and giving the mission that it is the ♁ self that must let itself be Destroyed	♃ as the secondary ruler of ♁ is in detriment here in ♃; mental communication with the Mental planes is subdued (but still used) as the dharma to Protect the path and find the true Self beyond the Yogic Self must be done with awareness and a transcending Love	Since V is the secondary ruler of ♁, it is in detriment here in ♄; secret powers are present but downplayed in Esotericist Creating even though the ego must face Maya's challenges and provocations to it's vision for a cooperative humanity and ambition for freedom of its Yogic self

Vishnu/Mystic Secondary Rulership Geo Sidereal	A I P ♃ Ignore	R4 ⊕ ☿ Strengthen	A III ♂ ♄ Develop
General	Ignoring rather than asserting is the way the spiritual will gets beyond personality concerns and brings out the inner Mystic; it is death by neglect and attrition	Inner probing and mystical processing Strengthens and secures the path to peace and harmony with Mother Earth and the Divine Mother behind her	The inner structure behind society is Developed through heightened insight and intuition and a quickened urge to change the established order that no longer serves spiritual purposes
Baba's Chart	IC	DC	AC ♀
	The Mother and one may say the female principle in general will be asserting itself, and that which is not in line with the new feminine will be Ignored and so fail to flourish	The ever present threat to the AC's success is the DC's fidelity to the false, but facing the Dweller in the Subtle shadows Strengthens the Mystic relationship with God and secures success	The Yogic Self's purpose is to Develop a loving mind that turns knowledge into wisdom, harmonizes opposites, relates spiritually to other human beings, and finally turns to God

Brahma/Occultist Secondary Rulership Geo Sidereal	R5 ♀ ♄ Dismantle	R6 ♂ ♃ Reinforce	R7 ♀ ♀ Build
General	Don't be afraid to take things apart to reconcile opposites and find the balance needed to bring it all together again in a better way	Through self determination, the spiritual is separated from the material and the material is made to serve it; testing and refinement serve to Reinforce the victory	Learn to Build occultly by being selective in what you choose and discriminating in what you perceive and communicate
Baba's Chart	♃ ♃ ♃ MC	♃pp	♃
	The spiritual path through the Subtle sphere is being Dismantled by Divine Decree and the Soul's Destiny there is to be self-taught in the law of karma, made aware of the storehouse of its sanskaras and given insight into how to deal with this and attain to the true mind in the Causal sphere	The dharma of intelligent action in the pursuit of Truth (Chit and ♃ in ♃ above) is Reinforced by testing and refining that which seems to be True and renouncing the false and misleading	There is karma in what we individually and collectively have done with our Occult efforts; we must now learn to Build with purity and humility (not the appearance of the same) in the pursuit of perfectly pleasing our Beloved

Foundational Resonance Reuptake of Aspects in General and in Meher Baba's Charts

With foundational resonance reuptake of the aspects, all the charts and resonances are pulled together into one set of resonances with the aspects. This means in one respect that the signs and planets from the prior lists are subsumed by the foundational resonances (being now within them). It also means that the foundational resonances have a particular role to play in all the charts, providing a special connection with the spiritual principles and astrological interpretations of foundational resonance.

(Note: the order of the terms under each spiritual principle is changed to correspond to the order of the charts—from bottom up the are Geo Tropical (B: IS), Geo Sidereal (M: YS) and Helio Sidereal (V: BB))

Foundational Resonance	♌ Peace Peace of Mind	♋ Knowledge Control through Love	♎ Caring Fidelity
General	Peace of Mind comes from ridding oneself of unnecessary doubts, conflicts and confusion; and the pursuit of spiritual freedom to the God given goal of individual God Realization makes all at odds with this unnecessary; so there is no will save the will of God within and without joining forces since they are the same, as they must be, which leaves the R1 will of what used to be a separative ego with a Peace that surpasseth all misunderstanding, mistaking and misleading	When Love Controls our choices, it controls our communication and perception and leads to Knowledge worthy of the name, which allows wisdom to dawn and awareness to expand; and this in turn makes for a heart that overflows with Love and spiritual understanding and comes to know and have faith in eventual Union with God, which leaves no room for anything else within that heart, R2 loving expansiveness having accessed and assimilated all	There is discipline, efficiency and creativity to the playing out of the Law of Karma, which is really most benevolent and Caring in its Fidelity to the deep inner processes of the Path; when our own R3 active and creative bent is aligned with God's Law, there is nothing left for the ego to do or undo and it is all but taken up (Mahesh) in compliant cooperation with the carrying out of the ways of Creation (Brahma)

	The surest way to be done with something and have it never come back (like this iteration of the Kali Yuga) is to have it Cut Off from its source, and God through the Causal sphere is the only source; here there are planets from all three chord positions (the middle one has two) taking part: so there is the will and power to do it, the calling and inspiration to do it, the faith and ability to do it, and the understanding and connections to get it done	There is no Support but Love which comes from and through the heart of God; and this R2 Love allows you to connect to the A II Ananda	Knowledge and understanding of the Law as well as facility with the patterns and permutations of Creation allows one to Supply what is needed for the carrying out of that Law

	The triple resonance of Mahesh is Destroy, and destroying the ne'er do well tendencies that are hell bent on taking you backwards is a practical thing to do; and here it is done with enthusiasm and the ability to win, and also spiritual power aligned with God's Will and closely allied to compassion coming with a sense of self-sacrifice	Connect to the knowledge of the Path and your part in it and Protect this Path and your part so that the heart can be known in expansive joy	The path is not ready made (though the Plan is there), rather we Create it (from that Plan); and this deeply probing process and play of opposites is facilitated by our AC Soul's purpose coming to terms with its DC opposite and it's attraction to this opposite, as well as facing the Dweller found there

	Decisively Disposing of the dross and the dregs in our material (and emotional) foundation (IC) as well as social functioning, philosophy and religion (♃) through real, spiritual valuation and determined leadership will bring victory to God within and Peace not passivity to the ego and its will	Remaking ourselves materially (mentally, astrally and physically) in order to know the Reality of God and find faith for our eventual Union with Him is aided by the conjoined (and conjunct) efforts of destruction of the empowered false with the regeneration of the impoverished Real and redemption of what was thought lost with the inspiration of the newly found	Comprehension of (our part in) the Plan and actively, creatively and intelligently carrying out that Plan lets us get past doubt and distress to Reclaim the lost and errant parts of ourselves in order to secure our success in making our way toward God

General	The Divine Will is behind the Spiritual Will and the very will-to-be (separate) of the ego (resonant with and in full manifestation as the Yogic Self), and it eventually musters up enough Courage in the ego-will of the Embodied Soul for it to face itself and Long for its own ending and merger in God, which by definition is the overcoming of Maya, the assertion of the Real Self and the final reuptake of all the falseness of ego	The Purification of all the karmic impressions of the Egoic Matrix (R4), especially throughout the moon's triple unveiling and the potential ego inflation that accompanies it, brings a natural Humility to the heart in sympathy with the Inner Mother; and with this we learn to return all we have borrowed to the Mother at all levels and in all spheres so the R4 Egoic Matrix itself can be taken up in harmony with God's divine dramatization of His Lahar	Obedience to Divine Law reveals its true Mercy and upon reflection gives insight and opportunity to adjust human laws so that the whole issue of law becomes not one of enforcement but a compassionate bringing together, wherein the fallen third (A III in general and by design, e.g., the vehicles and third aspect of third Egoic Matrix = Outer Personality) is taken up and reunited with the Embodied Soul and God's Plan

	After the Ignoring comes the Withdrawing, which means no longer in the world (any world) or of it, without planetary focus save to say the natural AC (first House) function of the heliocentric chart—the BB's purpose, Withdrawing into Self/God	Vishnu in triple resonance is Sustain, and the Divine Dramatization (Theme) is sustained from the heliocentric Causal with Law and Order, definition and discipline, and the embodiment of all the higher chord planets	The Dignified opportunity of an enlightened mind is to receive from the heart and Nurture a change in the established order that will better the human condition

	At some point we must no longer give our sanction to working on our wounds and realizing our potential, we must turn our back on our psychospiritual fears and fantasies and by Ignoring, end them; this Ignoring being the Mahesh-Mahesh of Vishnu (the keeper of the Creation and one and only way to God through which the Avatar comes); and here in the Subtle resonance zone, the Ignoring applies as well to Pandora's panoply of gods and goddesses and their endless mayavic manipulations	The entanglement of impressions that constitute karma now must be directly faced in the Subtle sphere of empowered desire, and the facing and taking on (and in) of the inevitable conflicts and crises Strengthens the heart to meet them and resolve them; and upon resolution, the ♃ itself remains as a source of strength to combat collective karma	To Develop the new Path (application of spiritual principles) through the Subtle sanskaric sphere, the karmic accountant is here with the storehouse of sanskaras, the higher mind linked to the collective mind and the spiritual goal (MC); and that higher mind in Dignity should have the intuition and insight to do it

General	The Effulgence of God is seen after the Renunciation not only of darkness but of false light, which requires removing any ego entanglement with lesser loves and finite truths—a reuptake from the R5 Will to Love-Truth	Desperation to know the Truth of God takes over all seeking, searching and desiring so that this single pointed focus of the unrealized self (ego) removes the resistance to Destiny and allows the reuptake of any other ego identity from the R6 desire nature	The Wisdom of Surrendering control over the structure and organization of the material of Creation in all the spheres of that Creation for the purposes of God known only in the Beyond allows for the reuptake of ego from the R7 mind-body

	Beyond Replacing and Dismantling is the total Abandoning of that which is false and guides the false; this Will to Love-Truth is aided by an intense desire for the same, which uncovers a spiritual instinct as it were, your sentient connection to the Lahar	The Truth of the highest path of desperate devotion is ever Maintained without qualifying or narrowing its focus	The Path, the Creation and the Whim that started it all remain Preserved in this age and the New Age (and all ages) without question or distinction

So Many Charts, So Many Parts, So Make a Sandwich

God sets up the whole (astrological) system, comes periodically to adjust it and define the next phase, and casts you in it. And we try to understand and work with it as best we can. The perspective and directive of The Heavens on Earth book has you look at all your charts (Causal/Heliocentric Sidereal, Subtle/Geocentric Sidereal, Gross/Geocentric Tropical), integrate them hierarchically and then find yourself within Meher Baba's charts, His charts representing charts for collective humanity (inclusive of little you) because He is the Avatar of the Age, and His charts having something uniquely for you (you who will someday merge with God) because He is the Eternally Living Perfect Master for everyone (and the Divine Perfection of God can arrange for such individual and collective insights to be mapped on the star charts while waiting to be unwrapped through your Soul parts). No doubt the collective part and being in His chart pricks the pride, but the uniquely you part brings balance and adds paradox to this. And now with foundational resonance and reuptake, the paradox goes even further. We are to realize our Divine Destiny through our unique Divine Human Nature even though we don't really exist while He, the Avatar, the Ancient One takes birth in us and is us and we are told to forget ourselves and find Him there—in us, in our hearts.

So make that chart of charts and find yourself as your Self within Him even as He awakens in you. You are surrounded by His chart *and* He is within your heart. So give your star chart Soul part self to Him within and without until nothing remains of you that is apart from Him. Make yourself (a) His Wish sandwich, and in His eating merge into Him, God, the Avatar and Ancient One.
